

# DESIGN CHALLENGE:

1 Decide on plastics food packaging item you want to redesign. What have you chosen?

2 Select someone in your group and let them use the item. How do they use it? What do you notice?

3 Ask that person to choose one thing  
...they like most about the item?  
...that could be better?

4 Write a list of things your packaging needs to do:

- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_
- \_\_\_\_\_

7 Select one idea that you want to explore further and prototype.

6 Use post-its and write or draw as many ideas as possible to answer your **'how might we...'** question from number 5.

5 Write down your 'how might we' question in the following format.

*"How might we design a \_\_\_\_\_ so that  
\_\_\_\_\_  
\_\_\_\_\_ and is fit for the circular economy?"*

8 Now, it is time to use your design box! Use the items in your box to build a prototype for your idea.

Tip: Don't overthink, just build and bring your idea to life!

9 Share your idea! Prepare your presentation:

- 1) What was your 'how might we' question?
- 2) Present your prototype.

10 Congratulations, you are now a designer! What have you learnt today?
